Professional Summary

Full-Stack Engineer with a strong backend focus, building production-oriented web applications using **React, Next.js, TypeScript, Node.js, Express, PostgreSQL, MongoDB, Redis, and REST APIs**. Hands-on experience with telemetry systems, background queues, authentication, rate limiting, caching, real-time communication, payments, email workflows, Docker, testing, CI/CD, and modern cloud deployment. Interested in backend reliability, API design, production debugging, performance, and end-to-end product development.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, Responsive UI

Backend: Node.js, Express.js, REST APIs, JWT, Google OAuth, Zod, Middleware, Rate Limiting, Socket.IO

Data & Async: PostgreSQL, MongoDB, Mongoose, Prisma, Redis, BullMQ, Caching, Queues, Supabase

Testing & DevOps: Supertest, API Testing, Integration Testing, Docker, Docker Compose, GitHub Actions, CI/CD

Services & Deployment: Stripe, Resend, Vercel, Netlify, Hostinger

Selected Projects

InflowAPM — Application Performance Monitoring Platform

inflowapm.vercel.app

- Built a telemetry platform using Next.js, TypeScript, Node.js, Express, PostgreSQL, Redis, and BullMQ for capturing and processing application/API events.
- Implemented project API keys, telemetry ingestion, Zod validation, Redis caching, project-level rate limiting, asynchronous queues, retries, and PostgreSQL analytics.
- Developed Node/Express SDK instrumentation so applications can send route, status, latency, and error telemetry from local or deployed environments.

Socially AI — LinkedIn Automation Platform

socially-aii.netlify.app

- Built a React and Express platform for LinkedIn content automation, tone-consistent post creation, post-performance tracking, and comment sentiment analysis.
- Integrated MongoDB, Google OAuth, Stripe payments, email workflows, user/admin dashboards, and automated product flows.
- Product is currently under beta testing and deployed on Netlify.

AutoCore — Automotive E-Commerce Platform

autocorestore.netlify.app

- Built a React, Node.js, Express, PostgreSQL, Prisma, and Supabase-based spare-parts commerce system with customer and admin dashboards.
- Implemented cart, wishlist, Stripe test-mode checkout, reviews, order tracking, admin fulfillment, shipping, and delivery-confirmation workflows.
- Added Docker-based development and CI/CD validation for automated checks before deployment to Netlify.

UniBro — Digital Campus Workspace

unibro-web.vercel.app

- Built a React and Express academic workspace where authenticated students can discover, upload, moderate, preview, and download academic resources.
- Implemented MongoDB, Supabase Storage, Google OAuth, JWT authentication, Resend email flows, role-protected administration, rate limiting, and Socket.IO-based community features.
- Maintained Docker, testing, CI/CD, and separate frontend/backend deployment workflows on Vercel.

Engineering Practices

REST API Design • Authentication & Authorization • API Validation • Caching • Background Queues • Rate Limiting • CI/CD • Docker • Production Debugging • Responsive Web Development

Education

Bachelor of Science in Computer Science

University of Engineering & Technology (UET) Peshawar

2023 – 2027

CGPA: 3.4 / 4.0
